

# Staircase vs Ladder

The Bamboo structure and design remain consistent across both Staircase and Ladders. However, differing household situations lead to distinct preferences: some spaces may only accommodate a Ladder with a steeper angle, fewer steps, and shorter run, while others may opt for the Staircase version, offering a more comfortable ascent with a lower angle. Staircase are generally priced higher due to their lower angle, longer stringer, increased steps, and inclusion of a sophisticated retractable handrail mechanism.

## Folding Staircase

**Angle:** 50° to 60°.

**Handrail:** Auto-folding mechanism.

**Tread Depth:** 168mm (6.6")

**Height:** 1200 - 3400mm (47.24 - 133.86")

**Width Options:** Narrow (575mm/22.64")  
or Wide (715mm/28.15")

## Folding Ladder

**Angle:** 60° to 70°.

**Handrail:** Optional, two sizes.

**Tread Depth:** 142mm (5.59")

**Height:** 1200 - 3700mm (47.24 - 145.67")

**Width Options:** Narrow (575mm/22.64")  
or Wide (715mm/28.15")
